

Student Developer, Data Department

Accunia Credit Management is a data-driven asset manager specialising in investments in structured credit, private debt, and high yield bonds established in 2009. Our 35 employees manage DKK 20 billion on behalf of institutional and private investors through our CLO vehicles, alternative investment funds, and managed accounts.

How will you make an impact?

We are seeking an ambitious student to join our newly established Data Department. The department is responsible for developing tools and visualisations used throughout the organisation, as well as managing data collection and maintaining databases.

Initially, you will have a broader set of tasks in various departments but generally with a focus on data-related responsibilities. Over time, you will transition to working exclusively within the Data Department. Examples of your tasks include:

- Developing new proprietary tools to automatise recurring tasks
- Improving existing processes and tools for efficiency
- Developing, maintaining and updating SQL-databases
- Visualizing large datasets, for example using Power BI
- Assisting with various ad-hoc tasks

How will you qualify?

You are currently enrolled at a university in a suitable technical programme with at least two years of studies remaining. As we are an investment firm, you should take interest in investments and financial markets. Additionally, we value candidates who:

- Take responsibility and ownership of their tasks
- Pay attention to detail and have a structured work approach
- Are team players with an ambitious and proactive mindset
- Have strong quantitative skills
- Have experience with programming languages (we use predominantly SQL and Python)
- Are proficient in Excel and VBA
- Are able to demonstrate their programming skills (GitHub etc.)

What do we offer?

We believe that working should be engaging, benefitting, and evolving. Due to our flat organisational structure, you will have the possibility to contribute shaping your own position over time. With this position, Accunia offers:

- A challenging and rewarding part-time job of minimum 800 hours per year with high flexibility, potentially turning into a full-time position
- Insight into the world of investment and finance
- An opportunity to use various methods from your university program in practice
- A dynamic, friendly, and international environment with highly skilled colleagues
- A social student environment with regularly occurring company events

Contact and Application

Please apply by sending your cover letter, resume, and grade transcripts in a single pdf-file to careers@accunia.com with the subject line "Student Developer". The application deadline is Monday 7th of October 2024. We may call for interviews before the application deadline. For any questions regarding the position, please contact Frederik Hansen (frederik.hansen@accunia.com).
